

THE STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS

State and Municipal Law Enforcement Technology Survey

**2003
Rhode Island
State and Municipal Law Enforcement
Technology Survey**

The Rhode Island Justice Commission is pleased to release the results of the fourth annual *State and Municipal Law Enforcement Technology Survey*. The survey has proven to be a valuable tool for law enforcement and criminal justice agencies to share “best practices” information statewide.

The highlights of 2003 were as follows:

- 96% of agencies operating same records management system;
- 79% of agencies operating Mobile Data Terminals;
- 72% of agencies operating on CDPD wireless hook-up.

The Rhode Island Justice Commission appreciates your continued interest and support in the programs we administer. We look forward to further assisting your agencies as we strive to improve the criminal justice system in Rhode Island.

COMMUNICATIONS INTEROPERABILITY

Under most circumstances, Rhode Island *fails* at all three interoperability scenarios; day-to-day, mutual-aid, and task force. All of the state's existing interagency land mobile radio (LMR) systems, Police Intercity, the Rhode Island State Police Emergency Radio Network (RISPERN), Washington County Police, Fire Intercity, and CDSTARS (state civil defense system), are all VHF high band radios, are not universally deployed and are non-repeaterized, local systems that cater to a specific constituency.

In 2003 the state began deployment of the Rhode Island Tactical Emergency Network (RITERN). The RITERN system has provided municipal police and fire dispatchers, as well as state agency first responders, access to a single frequency on the Rhode Island Department of Transportation (RIDOT) 800 MHz radio network. The primary purpose of RITERN *Phase I* is to function as an alert system, allowing the Rhode Island Emergency Management Agency (RIEMA) and the Rhode Island State Police (RISP) to notify local agency officials of emergency situations or to notify agencies of the need to participate in other communications activities such as conference calls, etc. RITERN is currently being extended to hospital dispatchers for the same limited purpose.

Also in 2003 the RI Justice Commission extended technical assistance to the Narragansett Police Department to apply for funding for the Washington County Interoperability Communications Project. This proposal was submitted to the Department of Homeland Security Preparedness and Response Directorate. The project award was approximately \$3,100,000 to implement a demonstration project that would bring a state-of-the-art interoperability solution to Washington County first responders. The project can be considered RITERN *Phase II*.

Police agencies in the Washington County area have a thirty-year experience and foundation on which to build a mutijurisdictional 800 MHz radio system on existing state-owned infrastructure that will encompass all first responders. A radio system that was established in the 1970's with Law Enforcement Assistance Administration (LEAA) funding still exists in that area. The vision of the project is to have interoperable communications, which will enable all agencies to communicate within and across departmental and jurisdictional borders. Through agency partnerships, establishment of a governance structure, innovative implementation, critical evaluation and foresight the project will stand as a model for replication in other areas of the state and throughout the nation.

The 2003 Law Enforcement Survey was the first time the RI Justice Commission queried agencies with regard to their radio base stations, mobile and dispatch units and NEXTEL telephones. Departments were also asked to report their interagency radio systems and the manufacturer of their equipment.
